

DH Styx Program is based upon a proprietary trading method of DeltaHedge and seeks to generate attractive absolute return trading a basket of currency futures traded on the CME. The program deploys a mix of trend-following strategies, working on the longer term, and a contrarian strategy based on five minutes time frame.

**Commentary**

June was a difficult month for DH Styx, that scored a heavy loss but managed to stay - slightly - in positive territory YTD. The main contributors to the negative performance have been strategies on Euro, Dollar Index and British Pound.
