

DH Styx Program is based upon a proprietary trading method of DeltaHedge and seeks to generate attractive absolute return trading a basket of currency futures traded on the CME. The program deploys a mix of trend-following strategies, working on the longer term, and a contrarian strategy based on five minutes time frame.

Commentary

DH Styx scored a slightly negative month, and unfortunately deepened the max drawdown. The set of quantitative strategies is momentarily put on hold in favor of an expert system set up on JPY/UUSD. We expect to resume the quantitative strategies in the next months.
