

DH Styx Program is based upon a proprietary trading method of DeltaHedge and seeks to generate attractive absolute return trading a basket of currency futures traded on the CME. The program deploys a mix of trend-following strategies, working on the longer term, and a contrarian strategy based on five minutes time frame.

**Commentary**

The set of quantitative strategies is back at work since mid month, as suggested by the expert system. The slightly negative performance of September is a combination of trading's result and the JPY/USD position opened during the month of August. The quantitative strategies are currently going through quarterly revision and trading has been completely resumed.
