

MONTHLY REPORT - Aug 2019

DH Styx Program is based upon a proprietary trading method of DeltaHedge and seeks to generate attractive absolute return trading a basket of currency futures traded on the CME. The program deploys a mix of trend-following strategies, working on the longer term, and a contrarian strategy based on five minutes time frame.

Commentary

In August the expert system started to generate again trading signals, after quite a long halt. The program is now running a limited number of strategies, but still this is a nice start.
