

DH Styx Program is based upon a proprietary trading method of DeltaHedge and seeks to generate attractive absolute return trading a basket of currency futures traded on the CME. The program deploys a mix of trend-following strategies, working on the longer term, and a contrarian strategy based on five minutes time frame.

PAST PERFORMANCE IS NOT INDICATIVE OF FUTURE RESULTS
Commentary

As previously mentioned, the results of the newly developed intraday strategy on GBP/USD are quite satisfactory so far, especially in light of the Sharpe ratio of the last 12 months. The fine tuning of the strategy and its future development are still object of study.
