

Boote program seeks to generate absolute returns by investing in a portfolio of Automatic Trading Strategies. This Management Futures Program is focused on Intraday time frame. The founding idea is to mitigate high volatility typical of intraday trading with a property portfolio management and an autoadaptive fixed risk money management. It is the oldest and more aggressive Program of DeltaHedge.

PAST PERFORMANCE IS NOT INDICATIVE OF FUTURE RESULTS

### Commentary

First positive month for DH Boote Program in 2017. Good results came from the Currency sector that on its own was able to generate a +4.4% with respect to the whole program. Metals and Energies showed strong and prolonged directional movements that our strategies were able to profitably catch, as in the case of Brent Crude Oil, Platinum and Copper. Equity Index sectors are still in deep draw-down. In particular we had no trades in European futures, almost no contribution from American ones and bad returns from Asian ones, active mainly on Nifty Indian market.

### Time Aggregate Analysis (%)

	36 mo	12 mo	6 mo	3 mo	1 mo
