

## MONTHLY REPORT - Apr 2017

Boote program seeks to generate absolute returns by investing in a portfolio of Automatic Trading Strategies. This Management Futures Program is focused on Intraday time frame. The founding idea is to mitigate high volatility typical of intraday trading with a property portfolio management and an autoadaptive fixed risk money management. It is the oldest and more aggressive Program of DeltaHedge.

PAST PERFORMANCE IS NOT INDICATIVE OF FUTURE RESULTS

### Commentary

Third negative month this year. The program is performing under expectations with low returns' volatility. Only agricultural markets are positively contributing to the program's performances. Low volatility levels and toppish equity markets are at the origin of the actual bad performances. We expect an increase in volatility due to the incoming macroeconomic events, which should boosts the performance of our strategies.

### Time Aggregate Analysis (%)
