

Boote program seeks to generate absolute returns by investing in a portfolio of Automatic Trading Strategies. This Management Futures Program is focused on Intraday time frame. The founding idea is to mitigate high volatility typical of intraday trading with a property portfolio management and an autoadaptive fixed risk money management. It is the oldest and more aggressive Program of DeltaHedge.

### Commentary

A positive month characterized by intense trading activity and high volatility of returns. The strategies on the energy sector have performed worse than expected. Instead, the currencies sector has performed over expectations, partly offsetting the losses on the energies. Everything else is on average.
