

DH NIX Alpha Program is based upon a proprietary trading method of DeltaHedge and seeks to generate attractive absolute returns through investments in just one market: E-mini 5\$ Dow Jones Industrial Average Futures at CME. The founding idea of the Program is to decline the diversification concept in Automatic Trading Systems portfolios, trading only on a single Futures with a multi-strategy approach. Designed as institutional version of DH Nix Program, with a customized Money Management algorithm.

PAST PERFORMANCE IS NOT INDICATIVE OF FUTURE RESULTS

Commentary

The slightly negative performance of the program is due to a bad option trade on the EUR/USD exchange rate. The contrarian and the trend following strategies produce more stable performances and the results are in line with our expectations.

Starting from July, the program is taking a little more exposition on 30 minutes time frame based strategies.
