

DH NIX Alpha Program is based upon a proprietary trading method of DeltaHedge and seeks to generate attractive absolute returns through investments in just one market: E-mini 5\$ Dow Jones Industrial Average Futures at CME. The founding idea of the Program is to decline the diversification concept in Automatic Trading Systems portfolios, trading only on a single Futures with a multi-strategy approach. Designed as institutional version of DH Nix Program, with a customized Money Management algorithm.

Commentary

Dh NixAlpha scores a second important positive month in 2018, marking a new High Water Mark and recovering from the loss cumulated in 2017. Market conditions characterized with a return in volatility and more directional movements prove once again the ideal market condition for this program, whose results experienced a negative correlation with plunging markets.
