

DH NIX Alpha Program is based upon a proprietary trading method of DeltaHedge and seeks to generate attractive absolute returns through investments in just one market: E-mini 5\$ Dow Jones Industrial Average Futures at CME. The founding idea of the Program is to decline the diversification concept in Automatic Trading Systems portfolios, trading only on a single Futures with a multi-strategy approach. Designed as institutional version of DH Nix Program, with a customized Money Management algorithm.

Commentary

After the negative quite negative performance of June and a negative start of the month, DH NixAlpha managed to recover but not enough to close with a positive sign. The low volatility and continuous change in direction generated few signals for the trend - following strategies, which scored little positive results then followed by small losses.
