

DH NIX Alpha Program is based upon a proprietary trading method of DeltaHedge and seeks to generate attractive absolute returns through investments in just one market: E-mini 5\$ Dow Jones Industrial Average Futures at CME. The founding idea of the Program is to decline the diversification concept in Automatic Trading Systems portfolios, trading only on a single Futures with a multi-strategy approach. Designed as institutional version of DH Nix Program, with a customized Money Management algorithm.

Commentary

October was a difficult month for NixAlpha: after a very good start, culminated with a great result on the 10/10 the strategies scored three import losses that represented an outlier in the distribution. The situation is now back to a normal behaviour: the R&D team is constantly monitoring the development of the return distribution.
