

DH NIX Alpha Program is based upon a proprietary trading method of DeltaHedge and seeks to generate attractive absolute returns through investments in just one market: E-mini 5\$ Dow Jones Industrial Average Futures at CME. The founding idea of the Program is to decline the diversification concept in Automatic Trading Systems portfolios, trading only on a single Futures with a multi-strategy approach. Designed as institutional version of DH Nix Program, with a customized Money Management algorithm.

PAST PERFORMANCE IS NOT INDICATIVE OF FUTURE RESULTS

Commentary

DH NixAlpha closed an amazing year with an important positive result and a new HWM. The quarterly review performed after year end highlighted the robustness of the trading system. The R&D team is constantly monitoring the return distribution with a particular focus on the negative outlier and the MtE is well in line with the expectation.

Time Aggregate Analysis (%)

| | 24 mo | 12 mo | 6 mo | 3 mo | 1 mo |
