

DH NIX Alpha Program is based upon a proprietary trading method of DeltaHedge and seeks to generate attractive absolute returns through investments in just one market: E-mini 5\$ Dow Jones Industrial Average Futures at CME. The founding idea of the Program is to decline the diversification concept in Automatic Trading Systems portfolios, trading only on a single Futures with a multi-strategy approach. Designed as institutional version of DH Nix Program, with a customized Money Management algorithm.

Commentary

The first half of February was a positive one for NixAlpha thanks to markets characterized by short term directional movement and growing volatility. The second part of the month is a different story: market turned choppy and, as a consequence, NixAlpha suffered and beat a retreat in the trenches as trend following strategies in chopiness phase fail to find synchrony with the markets and managed to score restrained losses.
