

DH NIX Alpha Program is based upon a proprietary trading method of DeltaHedge and seeks to generate attractive absolute returns through investments in just one market: E-mini 5\$ Dow Jones Industrial Average Futures at CME. The founding idea of the Program is to decline the diversification concept in Automatic Trading Systems portfolios, trading only on a single Futures with a multi-strategy approach. Designed as institutional version of DH Nix Program, with a customized Money Management algorithm.

### Commentary

June has been a positive month for NixAlpha, that at last was able to find the right synchrony with the market. The quarterly reviews performed have confirmed the correctness of the parameters of the strategies and confirmed the overall robustness of the system. Hopefully, with a little help from the directionality of the market, NixAlpha is ready to start the second half of the year with the right foot.
