

DH NIX Alpha Program is based upon a proprietary trading method of DeltaHedge and seeks to generate attractive absolute returns through investments in just one market: E-mini 5\$ Dow Jones Industrial Average Futures at CME. The founding idea of the Program is to decline the diversification concept in Automatic Trading Systems portfolios, trading only on a single Futures with a multi-strategy approach. Designed as institutional version of DH Nix Program, with a customized Money Management algorithm.

PAST PERFORMANCE IS NOT INDICATIVE OF FUTURE RESULTS

Commentary

In the month of October, DH NixAlpha behaved quite well in a continuous succession of positives and negatives returns in a small range. The negative performance is due to the negative performance scored on the last trading day of the month. Average Margin to Equity and the overall robustness of the trading system is well within our expectation.
