

DH NIX Alpha Program is based upon a proprietary trading method of DeltaHedge and seeks to generate attractive absolute returns through investments in just one market: E-mini 5\$ Dow Jones Industrial Average Futures at CME. The founding idea of the Program is to decline the diversification concept in Automatic Trading Systems portfolios, trading only on a single Futures with a multi-strategy approach. Designed as institutional version of DH Nix Program, with a customized Money Management algorithm.

Commentary

DH NixAlpha strategies were once again ready to reap the benefit of a couple of days of increased volatility and managed to defend the realized gains : as a result, the semester closes with a new HWM. The quarterly review of the strategies confirmed the great condition of the program. MtE slightly increased in the second quarter of 2020, averaging at 3,0%, i.e. well within our expectations.
