

DH NIX Alpha Program is based upon a proprietary trading method of DeltaHedge and seeks to generate attractive absolute returns through investments in just one market: E-mini 5\$ Dow Jones Industrial Average Futures at CME. The founding idea of the Program is to decline the diversification concept in Automatic Trading Systems portfolios, trading only on a single Futures with a multi-strategy approach. Designed as institutional version of DH Nix Program, with a customized Money Management algorithm.

Commentary

In the month of July, NixAlpha suffered a setback to say the least. The strategies failed to read the market movements, collecting wrong trade after wrong trade. The strategies parameters have been double tested and proved to be correct ones. As a prudential measure, the customers have been advised to deleverage the program that will keep working at a slower pace.
