

DH NIX Alpha Program is based upon a proprietary trading method of DeltaHedge and seeks to generate attractive absolute returns through investments in just one market: E-mini S\$ Dow Jones Industrial Average Futures at CME. The founding idea of the Program is to decline the diversification concept in Automatic Trading Systems portfolios, trading only on a single Futures with a multi-strategy approach. Designed as institutional version of DH Nix Program, with a customized Money Management algorithm.

**Commentary**

The first week of the new year started with a positive tone, but unfortunately the gains were then erased due to a persistent condition of congestion in the equity market. As a result, DH NixAlpha closed the month with a relatively small loss. R&D team is working on developing a new trading idea, based on momentum. The study is still at a very early stage, update will be provided in the next reports.
