

DH NIX Alpha Program is based upon a proprietary trading method of DeltaHedge and seeks to generate attractive absolute returns through investments in just one market: E-mini 5\$ Dow Jones Industrial Average Futures at CME. The founding idea of the Program is to decline the diversification concept in Automatic Trading Systems portfolios, trading only on a single Futures with a multi-strategy approach. Designed as institutional version of DH Nix Program, with a customized Money Management algorithm.

Commentary

Fourth positive year in a row, a good result for our program! December was slightly negative, with few opportunities of trading. We hope to have new important developments of this program in the first quarter of 2022 to reduce time between high water marks.
